

This happened Oct.29 2007

The dog was adopted to a loving family in the Jackson Ms area who adore him. He is housetrained and is the perfect pet to them.

Just reflecting.....

I wish animal cruelty laws were like they should be. Someone should be punished for this misery.

This male Shih Tzu was bought from a pet store 3-4 yrs ago along with a female at the same time or close to. The people were encouraged to buy and breed these dogs and sell the puppies back to the pet store to get their money back on the dogs. The female was bred in every heat cycle and the puppies were bought from the pet store to resale. During the lives of the dogs, they were kept outside in a fenced area with tall grass, dog food molded to the ground and covered in fire ants and dark green water to drink. They were never washed or groomed or received vet care. The last litter took the life out of the unhealthy female. The puppies all died and then the female died shortly after. All is left is the male who has been barely existing in this horrible condition.

If you think this is uncommon, think again. This is the result of backyard breeders, puppy mills and pet stores that sell dogs. If you shop at pet stores that sell dogs, or buy a puppy from a parked car, then you will be supporting this cycle of greed. The next time you see that adorable puppy in the pet store, remember the misery that produced it.

Prisoners of greed.

Make you angry? You can just shake your head or you can speak up. Educate people.
